

1

100% of projects carried out by NOVELPAY are implemented – applications developed by our team are used daily by several million users across Europe.

2

We supply terminals and payment applications to all 5 the largest European acquirers.

3

We are constantly bringing to the market new models of payment terminals and implement the most advanced technologies - 72% of all payment terminals delivered by NOVELPAY within the last 12 months were devices with the Android system.

4

With headquarters in Warsaw and subsidiary in Paris and numerous distribution contracts, NOVELPAY operates across Europe, and beyond (among others also in Belgium, Switzerland, Sweden, Germany and UK).

5

We are a technology partner and the exclusive distributor in Poland and France of the largest global producer of payment terminals - PAX Technology - a company listed on the Hong Kong stock exchange [HKEX: PAXGLOBAL]. The PAX's R&D centre is located in Shenzhen which is considered to be the "Asian Silicon Valley".

6

NOVELPAY is the largest R&D group and software house for PAX Android terminals in Europe. The best of our expert conduct technical training for PAX's European partners network.

7

Each year, NOVELPAY obtains certificates according to standards set by leading payment industry organization, i.e. nexo, CB, PCI, and others.

8

We are a nexo-standards member and the only company that has obtained nexo certification for both attended and unattended devices in accordance with subsequent versions of the standard (nexo IS 3.2 in 2016, IS 4.0 in 2021). We have already started work for certification according to version IS 5.0.

9

NOVELPAY's atmosphere is that of solid team-spirit rooted in the pursuit of common goals and we are growing - our HR turnover is tremendously low - within the last 12 months we lost only 2 and gain 10 new employees.

10

We support you at your individually designed carrier path – we offer different roles and various growth opportunities, we value creative thinking and autonomy, expect individual engagement and great sense of responsibility for the output of performed tasks.
